

Is it really worth \$15,000 a month?

You like living big. But in these times, when you add up the taxes, utilities, insurance, and maintenance expenses, your house can be the one thing keeping you from living the way you want to. But there's a way to have it both ways—The Lexington Condominiums. Designed by KRS, The Lexington has everything you are accustomed to: 10' ceilings, classic oak floors, solid granite counters and the finest fixtures. It also has everything you are not accustomed to like Memphis' finest shops, restaurants, movie theatres and sports facilities right outside your door. So, instead of spending all your time and money taking care of your house, you can spend it another way. And take care of yourself.

Downsize. Not Downgrade.
